

Installation of electrical distribution boxes in Swedish homes

Article Overview

Electrical distribution boxes in Swedish homes must be installed by certified electricians in compliance with national safety standards to ensure safety and functionality.

Legal and Safety Requirements

In Sweden, all fixed electrical installations, including distribution boxes (säkringsskåp), must be installed by an authorized electrician under the Electrical Safety Act 2016:732. Unauthorized installation is illegal and not covered by insurance in case of damage or fire. The installation must comply with Swedish Standards SS 436 40 00 and SS 437 01 02, which cover design, erection, connection, and metering of electrical installations. The National Electrical Safety Board supervises compliance and provides guidance for safe installation practices.

Practical Installation Guidelines

- **Panel Selection:** Modern panels should include residual current devices (RCDs), miniature circuit breakers for each group, and space for future expansion. Brands commonly used include ABB, Eaton, and Hager.
- **RCD Requirements:** RCDs are mandatory for sockets in wet rooms and outdoors, with a standard 30 mA trip current. They are recommended throughout the house for enhanced safety.
- **Upgrading Older Panels:** Older fuse boxes may not handle modern electrical loads...
