

Installation price of exposed wiring distribution box

Article Overview

The typical cost for installing an exposed wiring distribution box ranges from \$150 to \$500, depending on box type, material, and labor complexity.

Distribution Box Costs

The price of a distribution box varies based on material, size, amperage capacity, and weatherproofing. Basic indoor plastic boxes for residential use can cost \$10-\$60, while metal or weatherproof boxes suitable for exposed wiring installations range from \$70-\$450. Larger or industrial-grade boxes with higher amperage ratings and multiple circuits can cost \$400-\$1,500 including parts.

Installation Labor

Professional installation is a significant portion of the total cost. Electricians typically charge \$40-\$100 per hour, with a standard installation taking 2-5 hours depending on complexity, accessibility, and wiring requirements. For exposed wiring setups, labor may be slightly higher due to additional safety measures and cable management. Average installation costs range from \$100 to \$300 for standard residential boxes, while full panel or multi-circuit installations can reach \$800-\$1,500.

Factors Affecting Total Cost

- Box Material: Plastic is cheaper but less durable; metal or weatherproof boxes are...
