

Installing Network Security Equipment

QSFP28

Article Overview

QSFP28 transceivers are hot-swappable modules that must be handled with ESD precautions and installed carefully to ensure reliable high-speed network connections.

Preparation and Safety

Before installing QSFP28 modules, ensure the following:

- ESD Protection: Wear an ESD-preventative wrist strap connected to a grounded point to prevent electrostatic discharge damage to the transceiver ().
- Device Power: QSFP28 modules are hot-swappable, but confirm the device supports hot-insertion. If unsure, power down the device before installation ().
- Clean Environment: Keep transceivers and fiber-optic cables free from dust and contaminants. Use dust caps when modules or ports are not in use ().
- Compatibility: Use only QSFP28 modules certified for your device. Ensure the port wavelength and cable length match the specifications of the other end of the connection ().

Installation Steps

- Remove Dust Caps: Take off the protective caps from both the transceiver and the port. Keep them for future use ().
- Orient the Module: Align the QSFP28 module with the port so the connector faces the correct direction. Do not force the module ()....
