

Intelligent Optical Distribution Box System

Overview

High-capacity intelligent ODF (Optical Distribution Frame) stands out as a central component of fiber optic communication infrastructures. These smart frames are designed to effectively manage optical fiber cables, keep connections organized and optimize network performance. Achieve successful cable management, handle high amounts of fiber cable and add density to fiber frames with the new DCX Optical Distribution Frame (ODF) System which features innovations like flippable cassettes, modular frame design and multiple configuration options. The ODF System Components. Fiber distribution box is made of high-strength engineering plastics, anti-UV, anti-aging ability. OPNET systems meet today's requirements for tomorrow's applications.
