

# Invisible Fiber Optic Router

## Article Overview

Invisible fiber optic kits like InvisiLight or Invisalite allow high-speed, nearly invisible fiber connections to your router, enabling gigabit or higher speeds without disrupting home aesthetics.

### Invisible Fiber Optic Kits

InvisiLight Home Fiber Kit and Invisalite Home Fiber Kit are designed to provide a clean, high-performance fiber connection from your modem to devices such as routers, computers, or gaming consoles . These kits include:

- Ultra-thin, bend-insensitive single-mode fiber (G.657.B3 compliant)
- Media converters to seamlessly convert Ethernet to fiber and back
- Cat6 cables, adhesive, cleaning wipes, and installation tools
- DIY-friendly installation with no drilling, splicing, or complex setup The fiber can be routed along baseboards, trim, or corners, making it virtually invisible while maintaining high-speed connectivity up to 1 Gbps, with future scalability to 10 Gbps or higher . This approach preserves home aesthetics and eliminates Wi-Fi dead zones by allowing the router to be placed in an optimal location.

### Router Compatibility

For optimal performance, routers that support fiber connections or high-speed Ethernet are recommended. Some top options include:

- ASUS RT-BE86U: Wi-Fi 7 (802.11be), quad-core 2.6 GHz processor, 10G WAN/LAN...
