

Italian Fiber Optic Connector Procurement Project

Article Overview

The Italian Fiber Optic Connector Procurement Project involves multiple initiatives to deploy high-capacity FTTH networks across business and industrial areas, with procurement opportunities for fiber optic equipment and services.

Key Projects and Initiatives

FONOI Project: The European Investment Bank (EIB) is financing the rollout of a fiber-to-the-home (FTTH) broadband network in Italy, targeting business areas on a wholesale basis. The project spans 2023-2025 and aims to connect industrial premises with very high-capacity broadband, fostering innovation and economic growth. The project is implemented by a private company, which is not subject to EU public procurement rules, but EIB financing provides favorable terms to support network deployment . **FibreConnect Services:** FibreConnect provides ultra-broadband FTTP (Fiber To The Premises) connectivity for Italian industrial and artisan areas. Each customer receives a dedicated optical fiber with speeds up to 10 Gbps, guaranteed transmission rates, and high service availability. The network is designed in collaboration with Internet Service Providers (ISPs), offering opportunities for ISPs to participate in network expansion and maintenance .
