

# JXF type distribution box dimensions

## Article Overview

JXF Distribution Boxes are available in multiple sizes and can be customized, with example dimensions such as 600×500×200 mm.

### Standard and Custom Dimensions

JXF series distribution boxes are designed to accommodate various electrical components, and their dimensions can be customized based on the size of the installation elements and user requirements . A typical example provided is 600 mm (height) × 500 mm (width) × 200 mm (depth), but other sizes are available depending on the number of circuits, rows, and components to be installed . When ordering, it is recommended to specify the model, box size, material thickness, and quantity.

### Material and Construction

The boxes are generally made of steel with a powder-coated finish for durability . They feature a zinc alloy AB lock, a 180° free-opening door, and a foam sealing strip to ensure protection against dust and moisture. Under special requirements, the protection level can reach IP55, making them suitable for indoor and semi-outdoor installations .

### Installation and Features

- Wall-mounted with see-through window and door for easy monitoring
- Through-holes on upper and lower sides for flexible cable entry...
