

L-shaped bracket installation of cable trays

Article Overview

L-shaped brackets are used to securely mount cable trays to walls, providing stable support and proper spacing for cable management.

Selecting the Bracket and Tray

Choose an L-shaped bracket compatible with your cable tray type—for example, wire mesh trays measuring 150–300 mm in width often use powder-coated metal brackets like the SmartRack SRWBWALLBRKT, which snap into the tray and mount to the wall with user-supplied hardware (Eaton) . Ensure the bracket material and finish are suitable for the environment, considering factors like corrosion resistance and mechanical load .

Tools and Materials Needed

- Drill and appropriate wall anchors or bolts
- Level and measuring tape
- Screwdriver or wrench for fastening
- L-shaped brackets
- Cable tray sections

Installation Steps

- Mark the Wall: Determine the desired height and alignment of the cable tray. Use a level to ensure horizontal placement....
