

MXPD Optical Module Classification

Overview

Optical module classification By package: 1*9, GBIC, SFF, SFP, XFP, SFP+, X2, XENPARK, 300pin, etc. By rate: 155M, 622M, 1.25G, 10G, 40G, etc. By mode: single-mode fiber (yellow), multi-mode. You can use different levels of 1.25 Gbit/s SFP/eSFP optical modules with GE interfaces and 10 GE interfaces. Figure 1-97. QSFP28 (Quad Small Form-factor Pluggable 28) Optical Module: Interface package size identical to QSFP+, supporting both 100G QSFP28 and 40G QSFP+ optical modules. The. It allows real time access to the transceiver operating parameters such as transceiver temperature, laser bias current, transmitted optical power, received optical power and transceiver supply voltage by reading a built-in memory with I2C interface. By wavelength: conventional wavelength, CWDM, DWDM, etc. They are widely used in data centers, telecommunications networks, and industrial communication systems.
