

Madagascar Super Energy Internet Enterprise

Overview

The project will develop decentralized and digital electricity infrastructure based on renewable energies in the north of Madagascar. The installation of nano-grids supplied with energy by solar panels will allow nearly 40,000 users to have access to electricity. Madagascar is connected to four major submarine cables—EASSy, LION/LION2, METISS, and 2Africa—with the 2Africa landing at Mahajanga in February 2023 and becoming operational in late 2023. Fixed broadband penetration is extremely low, at about 0.11 per 100 people in 2023, forcing most of the.

ANTANANARIVO, April 7, 2023 — The World Bank approved a \$400 million credit for the Digital and Energy Connectivity for Inclusion in Madagascar Project (DECIM) that will contribute to doubling energy access from 33.7% to 67% in Madagascar and add an additional 3. Our strategic alliances enables us to leverage cutting-edge technologies; enhance project capabilities; and ensure the highest standards of quality and. The World Bank Implementation Status & Results Report Digital and Energy Connectivity for Inclusion in Madagascar Project (P178701) Digital and Energy Connectivity for Inclusion in Madagascar Project (P178701) EASTERN AND SOUTHERN AFRICA | Madagascar | IBRD/IDA | Investment Project Financing (IPF). This note was developed by GOGLA with the support of the World Bank Group Lighting Global Program, the Energy Sector Management Assistance Program (ESMAP), the Shell Foundation, USAID, Power Africa, the UK Foreign Commonwealth & Development Office (FCDO) and Sustainable Energy countries' for All. According to the November 2023 edition of the Ericsson Mobility Report, mobile subscriptions in Sub-Saharan Africa are anticipated to experience a 3 percent annual growth, increasing from 940 million in 2023 to 1. The report highlights 5G as the most rapidly expanding subscription.
