

Network panel with three Cat 6 ports plus fiber optic cable

Article Overview

You can use a modular patch panel that combines three Cat 6 ports with fiber optic modules for flexible network setups.

Modular Patch Panels

Modular patch panels allow you to mix and match copper and fiber connections in the same rack unit. For example, the Telegärtner HD³-ES system supports modular RJ45 Cat 6, Cat 8.1, and fiber optic modules. You can configure the panel with exactly three Cat 6 ports and add fiber optic modules as needed, all in a tool-free, front-insertable design for easy installation and future expansion .

Hybrid Copper and Fiber Panels

Manufacturers like Belden and AMPCOM offer hybrid panels that combine copper RJ45 ports and fiber terminations. These panels are ideal for small offices, data centers, or industrial environments, providing high port density and reliable signal routing. They often support shielded ports and modular fiber adapters, allowing you to terminate single-mode or multi-mode fiber alongside Cat 6 connections .

Commercial Options

- Leviton provides a wide range of copper and fiber patch panels with flexible configurations, suitable for enterprise or custom setups
