

# Opgw optical cable processing equipment

## Overview

It includes radial locking gripper, mesh cable sock gripper, anti twist tension stringing tool, self-moving traction machine, block recover damper machine, cable replacement double pulley, OPGW cable block, quadrant cable block, and cable blower set. Prysmian has a built-in multi-step quality assurance programme, which covers the entire production process from cable design and raw materials purchasing, to final inspection for any single project. Components are engineered and manufactured to the highest standards, technologies and precision, resulting in unsurpassed productivity, line performance and. We are committed to providing you excellent but most cost-effective machines for your wire & cable manufacture. This is specially designed and manufactured planetary type stranding machine for making OPGW cable (Optical Fiber Composite Overhead Ground Wire). It breaks down the traditional boundaries between. Overhead optical fibre cable systems have become a key factor in telecommunications networks used by operators and power utilities. Our product adopts aluminum alloy material as its main body, which can effectively protect the OPGW. The diameter of OPGW had better be clearly indicated while an order is placed for the 20101 type product. Mesh Cable Sock Gripper This mesh cable sock.
