

Optical splitter sales price details

Article Overview

Optical splitter prices vary widely depending on type, capacity, and supplier, typically ranging from a few dollars for basic PLC splitters to several hundred dollars for high-performance or specialized models.

Price Overview

The direct sales price of optical splitters depends on several factors including splitter type (PLC, FBT, or uneven ratio splitters), port count (1x2, 1x4, 1x8, 1x16, etc.), insertion loss, and packaging (bare, ABS, LGX, or rack-mounted) . Basic PLC splitters for small-scale deployments can cost \$5-\$20 per unit, while high-capacity or precision splitters for enterprise or FTTH networks may range from \$50 to \$200 or more per unit . Custom or uneven ratio splitters (e.g., 1/99, 2/98) may carry additional costs due to specialized manufacturing .

Market Influences on Pricing

Global and regional market dynamics affect pricing. In Europe, for example, raw material costs, supply chain disruptions, and technological advancements have caused moderate price fluctuations . Manufacturers often optimize costs through automation, lean sourcing, and strategic partnerships, which can influence direct sales pricing . The growing demand for high-capacity optical networks, 5G infrastructure, and FTTH deployments is driving the need for scalable splitters, which can slightly increase prices for high-performance models .
