

Outdoor fiber optic cable broken

Article Overview

Do not touch the broken fiber; secure the area and contact a professional immediately to ensure safety and restore service.

Immediate Safety Steps

- Do not touch the broken cable or exposed fibers. The glass strands can cause serious injury, and infrared light from active fibers can damage eyes without pain (Phonoscope Fiber) .
- Secure the area to prevent others from coming into contact. Use caution tape, cones, or other visible markers to alert people to the hazard .
- Avoid attempting self-repair. Outdoor fiber repair requires specialized tools and training, including fusion or mechanical splicing, to restore signal with minimal loss .

Reporting and Professional Assistance

- Contact your service provider immediately. Report the damage via their outage reporting system or 24/7 support line. A trained technician will be dispatched to handle the repair safely .
- Document the damage if possible, noting the location, visible breaks, or environmental factors (e.g., crushed poles, water accumulation) to assist the repair team .

Temporary Measures (if applicable)

- For minor visible stress or bends in a cable near your property, you may gently reroute the cable to reduce sharp bends, ensuring the minimum bend radius is mai...
