

Performance of Gigabit Industrial Switches in Cambodia

Article Overview

Gigabit industrial switches in Cambodia offer high-speed, reliable connectivity with rugged designs suitable for harsh industrial environments, supporting PoE, industrial protocols, and wide temperature ranges.

Overview of Availability in Cambodia

Cambodia's market for industrial networking equipment includes local distributors like PSC Computer, which supply Gigabit, PoE, managed, and unmanaged switches from brands such as TP-Link, Prolink, and MikroTik. These switches cater to industrial and enterprise applications, providing options for both compact deployments and larger network infrastructures. The Cambodian electrical and electronics sector is growing, with assembly-focused companies and industrial facilities increasingly requiring robust networking solutions.

Technical Performance and Ruggedness

Cisco IE3100 Rugged Series switches deliver up to 20 Gigabit Ethernet ports with PoE support up to 240W, making them suitable for connecting IP cameras, phones, wireless access points, and sensors. They are designed for harsh industrial environments such as manufacturing, energy, transportation, and smart cities, featuring dual-input DC power, Media Redundancy Protocol (MRP), Resilient Ethernet Protocol (REP), and industrial automation protocol support including EtherNet/IP, Modbus, and PROFINET.

The Cisco IE3500 Rugged Series offers enhanced bandwidth, modularity, and advanced features like TSN frame-preemption, lossless redundancy (HSR/PRP), secure boot, and cybersecurity visibility through Cisco Cyber Vision. These switches are optimized for AI-driven analysis, machine vision, and edge-to-cloud connectivity, ensuring minimal jitter and high reliability in time-sensitive industrial applications.

The JXRD08G 8-port industrial-grade switch is a compact, DIN-rail mountable solution with a wide operating temperature range of -40°C to 80°C , IP40-rated enclosure, and built-in overcurrent protection. It is suitable for harsh environments and compact control cabinets, providing plug-and-play reliability for non-PoE industrial networks.
