

Power distribution box monitoring system with power supply

Overview

The distribution box is embedded with the DTU distribution device, distribution device power module, and distribution device power supply. By leveraging the intelligent remote monitoring function, you can remotely collect the electric meter readings and. Take your power distribution equipment to the next level by managing your critical loads at the individual circuit level. Rely on Cyberex circuit management solutions to monitor and alert your staff of potential problems before they occur. Understanding load profiles is the key to proactively. Product positioning Intelligent distribution box monitoring instrument, supporting real-time electrical data collection, energy consumption measurement and safety early warning. The EC1000 Energy Box has four Energy Sensor ports to connect to four Energy PDU modules and four Environment Sensor ports for external sensors to monitor. Electrical installations in large industrial facilities and power plants require constant monitoring in order to prevent disruption in production processes.
