

Price for installing a 1.5-meter distribution box

Article Overview

Installing a 1.5-meter distribution box typically costs between \$450 and \$1,500, depending on box specifications, labor, and installation complexity.

Distribution Box Cost Components

- **Material Cost:** The price of a standard residential distribution box varies based on size, amperage, number of circuits, and material. For a 1.5-meter box, which is considered a large residential or small commercial unit, the cost can range from \$150 to \$900 for the enclosure and internal components such as breakers and fuses .
- **Labor Cost:** Electricians typically charge \$40 to \$120 per hour, with installation of a large distribution box taking 4 to 10 hours depending on accessibility, wiring complexity, and whether it is a new installation or replacement . Labor can therefore add \$200 to \$1,200 to the total cost.
- **Additional Factors:**
 - **Indoor vs Outdoor Installation:** Weatherproof or outdoor-rated boxes cost more due to enhanced materials and sealing requirements .
 - **Permits and Code Compliance:** Local electrical permits may add \$50 to \$200 to the project.
 - **Complex Wiring or Upgrades:** If the installation requires new conduit runs, additional breakers, or surge protection, expect a 20-40% increase in total cost .

Typical Price Range

For a 1.5-meter distribution box installation in a standard residential setting:...
