

Price of 1000mm deep mesh cable tray

Article Overview

Pricing for 1000mm deep mesh cable trays varies by material, customization, and quantity, and is typically provided upon direct inquiry with manufacturers.

Product Overview

1000mm mesh cable trays are widely used for organizing and supporting electrical cables in commercial, industrial, and data center installations. They are available in galvanized steel, zinc-plated steel, and stainless steel, offering corrosion resistance and mechanical strength to support heavy cable loads while allowing airflow to prevent overheating . These trays can be cut, bent, and connected to fit curves, slopes, and tees, and accessories like dropouts and connectors enhance cable management .

Factors Affecting Price

- **Material:** Stainless steel and fiberglass trays are more expensive than galvanized or zinc-plated steel due to durability and specialized properties .
- **Customization:** Custom sizes, OEM/ODM designs, and additional accessories (dividers, covers, connectors) can increase cost .
- **Quantity:** Bulk orders often reduce per-unit cost, while small trial orders may incur extra fees .
- **Delivery and Lead Time:** Standard delivery is typically 7-25 days depending on stock availability and order size .
