

Price of Installing and Maintaining Optical Spectrometers

Article Overview

The cost of installing and maintaining optical spectrometers varies widely, ranging from a few thousand dollars for basic UV-Vis models to over \$50,000 for high-end FTIR, NIR, or Raman systems, with ongoing maintenance adding several hundred to thousands of dollars annually.

Initial Purchase and Installation Costs

UV-Vis Spectrometers: Basic benchtop UV-Vis models typically cost \$3,000–\$10,000, while advanced fluorescence or microvolume models can exceed \$50,000 due to higher sensitivity, specialized optics, and automation features . FTIR, NIR, and Raman Spectrometers: Prices for these instruments depend on the configuration, including measurement modules (transmission, reflection, ATR units, optical probes, autosamplers) and accessories. Benchtop FTIR systems like the Bruker INVENIO or Shimadzu IRTracer-100 can range from \$20,000 to \$100,000, while portable or handheld models are generally less expensive but compromise on resolution and stability . Installation Costs: Installation may include setup, calibration, and integration with lab software. For high-end systems, professional installation can cost \$1,000–\$5,000, depending on complexity and the need for environmental controls such as vibration isolation or temperature stabilization .

Maintenance and Operational Costs

Routine Maintenance: Optical spectrometers require periodic calibration, cleaning o...
