

Price of Photovoltaic Power Generation AC Combiner Box

Article Overview

PV AC combiner boxes typically range from \$50 to over \$500 per unit, depending on specifications, input strings, and protection features.

Typical Price Ranges

- Small residential or off-grid combiner boxes with 4-10 input strings and basic protection features are generally priced around \$50-\$150 per unit, suitable for low-power solar systems (Amazon listings, inverter.com) .
- Industrial or utility-scale combiner boxes supporting multiple string inverters (2-6 inverters, 60-200 kW) with high-voltage ratings (400-800 V AC) and advanced protections can cost \$300-\$500 or more, reflecting higher quality, certifications, and durability for harsh climates (Weidmüller) .
- IP65 waterproof, CE-certified, and high-voltage (up to 1500 V) combiner boxes for larger PV installations are available on platforms like Alibaba, with prices varying widely depending on the number of strings and customization options .

Factors Affecting Price

- Number of input strings: More strings increase the size and complexity, raising the cost.
- Voltage and current ratings: Higher voltage (up to 1000-1500 V) and higher current capacity require more robust components.
- Protection features: Overcurrent, overvoltage, surge protection, and lightning protection devices add to the price
