

Price of Three-Row Busbar Protection Box in China and Africa

Article Overview

In China, three-row busbar protection boxes typically range from \$2.50 to \$50 per unit depending on specifications, while in Africa, prices are generally higher due to shipping, import duties, and local distribution costs.

Pricing in China

Three-row busbar protection boxes are widely manufactured in China, with production hubs in Zhejiang, Jiangsu, and Chongqing . Entry-level copper busbars for small-scale or prototype applications can cost as low as \$2.50 per unit . Mid-tier options suitable for OEM integration or industrial panels typically range from \$10 to \$30 per unit, depending on voltage rating, IP protection, and material quality . Fully assembled, branded, and customized distribution boxes can reach \$40-\$50 per unit, especially when including high-IP-rated enclosures, thermal testing, and compliance with IEC 61439 or GB 7251 standards . Factors affecting price include:

- Voltage rating (1kV, 10kV, 35kV)
- Material (copper vs aluminum busbars, polyolefin insulation)
- Shape and configuration (T, I, L types)
- Ingress protection (IP) rating for outdoor or corrosive environments
- Customization (color, branding, and mechanical features)

Pricing in Africa...
