

Price of flat steel cable trays in Western Europe

Article Overview

Flat steel cable trays in Western Europe typically range from €25 to €150 per meter, depending on type, material, and finish.

Price Overview

The cost of steel cable trays in Western Europe varies based on tray type, material, and protective coating. Common types include ladder trays, ventilated trough trays, solid bottom trays, and wire mesh trays . Materials used are galvanized steel, stainless steel (304 or 316), and aluminum, with hot-dip galvanized and stainless steel options commanding higher prices due to corrosion resistance and durability . Based on flat steel prices in Germany, which were around \$2,860 per metric ton in March 2026, the raw material cost contributes significantly to the final tray price. For standard ladder or ventilated trays made from galvanized steel, prices generally start at €25–€40 per meter for lighter-duty trays. Heavier-duty or stainless steel trays can range from €80–€150 per meter, especially for industrial or outdoor applications requiring high corrosion resistance .

Factors Affecting Price

- **Material Type:** Stainless steel and aluminum are more expensive than galvanized steel due to higher raw material costs and manufacturing complexity .
- **Tray Design:** Ladder trays are usually less expensive than solid bottom or wire mesh trays because of simpler fabrication .
- **Finish and Coating:** Hot-dip galvanization or powder coating increases durability a...
