

Price of installing a secondary distribution box on a construction site

Article Overview

A standard secondary distribution box for construction sites typically costs between \$300 and \$1,200, depending on capacity, material, and features.

Overview

Secondary distribution boxes, also known as sub-distributors, are used on construction sites to safely distribute electricity from a main connection point to multiple circuits, powering tools, lighting, and temporary installations. They are designed for outdoor use, often featuring weatherproof housings (IP65 or higher), robust materials like sheet steel or technopolymer, and pre-wired configurations for rapid deployment ().

Price Range

- Basic units (single-phase, 32A-63A, simple CEE sockets) generally cost \$300-\$500.
- Mid-range units (three-phase, 63A-125A, multiple CEE and earthed sockets, pre-wired) typically range from \$500-\$900.
- High-end or specialized units (modular, smart monitoring, surge protection, heavy-duty outdoor enclosures) can reach \$1,000-\$1,200 or more ().

Factors Affecting Cost

- Amperage and Phase: Higher current ratings and three-phase systems increase price....
