

Price of plugs in a level 3 distribution box

Article Overview

A standard industrial plug for a Level 3 distribution box typically costs between \$50 and \$150, depending on current rating, voltage, and IP protection level.

Overview

Level 3 distribution boxes are designed for high-current, three-phase industrial applications, often requiring plugs rated for 32A, 63A, or higher, with voltage ratings of 220V to 380V . The plugs are usually 3-pin, 4-pin, or 5-pin configurations and may have IP44 or IP67 protection, depending on whether they are intended for indoor or outdoor use .

Price Factors

The cost of a plug depends on several factors:

- Current rating: Higher amperage plugs (e.g., 63A or 125A) are more expensive than lower ratings (16A or 32A) .
- Voltage rating: Plugs for 380V three-phase systems generally cost more than single-phase 220V plugs .
- IP rating: IP67 waterproof plugs are more expensive than IP44 plugs due to enhanced sealing and durability .
- Brand and certification: Reputable brands like Legrand, PCE, or Anssin with CE or CCC certification may charge a premium .
