

Pricing Rules for Primary Distribution Boxes

Article Overview

Primary distribution boxes typically range from \$10-\$2,000 depending on type, capacity, material, and features, serving as central hubs for safe electricity distribution in residential, commercial, and industrial settings.

Pricing Overview

The cost of a distribution box varies widely based on type, material, capacity, and additional features:

- Residential boxes: Small plastic units for home use generally cost \$10-\$25, while steel enclosures for higher capacity residential setups may range around \$40-\$200 depending on brand and protection rating .
- Industrial boxes: Larger, heavy-duty units with stainless steel or powder-coated steel enclosures can cost \$500-\$2,000 or more, especially when including high-quality circuit breakers, surge protectors, and busbars .
- Smart or intelligent boxes: Equipped with monitoring, remote control, and energy management features, these units often double the cost of traditional panels but can provide ROI within two years through energy optimization .
- Specialized boxes: Explosion-proof or outdoor-rated units with high IP protection (e.g., IP65) carry premium pricing due to durability and safety certifications . Material also affects pricing: aluminum alloy > steel plate > plastic, and certified products (IEC, UL, CE) typically cost 20-30% more than non-certified alternatives
