

Recommendations for the Optical Cable Industry

Overview

Actionable Recommendations: Quality Control: Address inconsistent quality in patch cables and flimsy builds in bulk cables. In 2025, AI-driven data centre investment rapidly emerged as the strongest driver of growth, while traditional telecom demand softened in several markets. Supply dynamics are also changing as Chinese exports dominance. The International Telecommunication Union (ITU) plays a crucial role in this by providing a series of recommendations that serve as global standards. This article explains eight of the most important global fiber and cable standards — ITU-T, IEC, TIA, ISO/IEC, and Telcordia — covering their scope, applications, and why they matter in. The Fiber Optic Association, Inc. (FOA) was founded in 1995 to help develop the workforce to build the fiber optic networks to support a rapid expansion in communications and the Internet. The charter of the FOA was to promote professionalism in fiber optics through education, certification, and. This document outlines the specifications for a single-mode optical fiber and cable designed for use around the 1310 nm zero-dispersion wavelength, suitable for both the 1310 nm and 1550 nm regions, and compatible with analogue and digital transmission. The global race to build digital infrastructure – from FTTx broadband rollout and 5G.
