

Single cost of high and low voltage complete sets of equipment

Article Overview

High-voltage complete sets typically range from \$500,000 to several million dollars, while low-voltage complete sets range from \$500 to \$10,000 per unit, depending on specifications and customization.

High-Voltage Equipment Costs

High-voltage (HV) complete sets include switchgear, transformers, protection devices, and automation systems. Typical costs vary based on voltage class, transformer capacity, and protection features:

- Small to mid-size substations (20–40 MVA) can cost \$3,000,000 to \$8,000,000 including transformers, switchgear, and civil works .
- Large transmission-level facilities may exceed \$10,000,000, depending on redundancy, interconnection, and site conditions .
- Individual HV switchgear units may use vacuum or SF6 circuit breakers, with prices influenced by insulation type, breaking capacity, and automation features .

Low-Voltage Equipment Costs

Low-voltage (LV) complete sets include distribution cabinets, metering boxes, and modular switchgear:

- Standard LV switchgear and distribution cabinets are priced from \$500 to \$10,000...
