

Spectrometer Calibration in the Netherlands

Article Overview

The Netherlands offers a range of ISO/IEC 17025-accredited spectrometer calibration services, including on-site and in-lab options for optical emission and fiber-optic spectrometers.

Key Calibration Providers

Micro Precision Calibration operates in Nijmegen and across the Netherlands, offering laboratory and on-site calibration services for a wide range of instruments, including spectrometers. Their labs are ISO 9001:2015 verified and ISO/IEC 17025 accredited, ensuring high-quality calibration with traceability to international standards. They serve major cities including Amsterdam, Rotterdam, Utrecht, Eindhoven, and more, providing full support for laboratory calibration, embedded solutions, and validation services. Kalibra International B.V. provides on-site and in-lab calibration services with ISO 17025 accreditation. They specialize in ensuring reliable measurements for industries such as food, healthcare, pharmacy, and manufacturing. Kalibra can calibrate instruments during production or downtime, offering flexibility for process-critical equipment. Minerva Metrology and Calibration in Amersfoort focuses on high-end spectrometer and pressure calibration. They maintain ISO/IEC 17025-accredited labs and provide traceable calibrations, repair services, and training. Minerva partners with the Dutch National Metrology Institute (VSL) for education and ensures complete traceability to the International System of Units (SI). Avantes in Apeldoorn offers specialized spectrometer calibration, including wavelength, linearity, and UV irradiance calibration with NIST traceability. Their lab supports visible and NIR wave...
