

# Standard Requirements for Buried Fiber Optic Splice Boxes

## Overview

Index 635-005 provides requirements for installation of partially buried Fiber Optic Splice Vaults on medians or roadsides. See Specification 635 for additional information. Underground cables are pulled in conduit that is buried underground, usually 1-1. FO-VC2 JOINT USE - VERICAL MIDSPAN CLEARANCES 48. (FOA) was founded in 1995 to help develop the workforce to build the fiber optic networks to support a rapid expansion in communications and the Internet. The charter of the FOA was to promote professionalism in fiber optics through education, certification, and. (a) Redefined unit to indicate installation of all units must be in compliance with RUS BULLETIN 1728F-700, REA Specification for Wood Poles, Stubs and Anchor Logs. This Index is primarily intended for use on Florida's Turnpike Enterprise corridors, but it may also be used for other. nt for embedded junction boxes will be made. Ensure the interior of the box body has a permanent marking that includes the manufacturer.
