

Standard Size of Landscape Lighting Distribution Box

Article Overview

Landscape lighting distribution boxes are weatherproof enclosures designed for outdoor electrical connections, typically rated IP66-IP68, with capacities ranging from 250V/10A to 6000W, and constructed from durable, flame-retardant materials.

Key Specifications

Electrical Capacity:

- Maximum power handling can reach 6000W, suitable for high-mast or flood lighting systems .
- Voltage and current ratings vary by model, e.g., 250V (10A) / 450V (24A) .
- High-voltage resistance up to 2750V is available in some models . Material and Construction:

- Housings are typically made from PC-94-2 grade plastic or other flame-retardant synthetic materials .
- Sealing gaskets are silicon-based to ensure waterproofing .
- Contacts are often copper, nickel-plated for corrosion resistance .
- Flame-retardant certifications such as V0/2 standards are common . Waterproof and Environmental Ratings:

- Common ratings include IP66 (dust-tight and protected against powerful water jets) and IP68 (submersible under pressure) for outdoor use .
- Designed to withstand wet locations, temperature extremes, and UV exposure.
