

Swiss After-Sales Service for Active Optical Devices DML

Article Overview

Switzerland offers comprehensive after-sales support for Active Optical Devices, including repair, retrofitting, spare parts, and end-of-life management, ensuring long-term operational reliability and sustainability.

Key Service Providers and Capabilities

SwissFactory.Group provides extensive after-sales services for technical devices, including optical systems. Their offerings include spare parts procurement, retrofitting, technology upgrades, service and repair, and end-of-life management. They focus on extending device lifespan, improving efficiency, and implementing sustainable disposal and recycling practices. Services are available for both in-house and third-party products, with rapid and professional repair handling by specially trained staff. Zollner Elektronik AG specializes in holistic after-sales support for electronic and optical devices. Their services cover manufacturer-independent spare parts, repair, refurbishment, and obsolescence management. They provide long-term support, including disassembly, repair, assembly, and final function testing. Zollner ensures fast delivery within Europe, with options for flash delivery or standard 48-hour service. Their repair processes follow IPC standards, guaranteeing quality and reliability for complex systems. SwissOptic AG is a trusted partner for optical systems, offering support along the entire value chain from concept to production. While primarily focused on development and integration, they provide long-term service solutions for optical devices, including maintenance and system upgrades
