

# Swiss Relay Protection Tester Price

## Article Overview

Swiss relay protection testers typically range from \$10,000 to over \$50,000 depending on model and functionality.

Protection relay testers are specialized devices used to test and validate the performance of protective relays in electrical power systems. Swiss-made models, such as those from Megger or other high-precision manufacturers, are known for reliability, accuracy, and compliance with international standards like IEC 61850 . Prices vary significantly based on features, including the number of current and voltage outputs, phase testing capabilities, automation, and software integration .

### Price Range and Factors

- Entry-level or single-phase testers: Around \$10,000-\$20,000. Suitable for basic relay testing in small substations or educational labs .
- Three-phase or multi-function testers: Typically \$20,000-\$35,000. These can handle complex relay schemes, including digital and microprocessor relays .
- Advanced or fully automated systems: \$35,000-\$50,000+. High-end models include features like IEC 61850 testing, GOOSE messaging simulation, and integrated software for automated testing and reporting .

### Purchasing Considerations

- Software and firmware: Some testers include onboard software for automated testing, while others require PC-based software for advanced functions .
- Portability: Field-portable testers are lighter and easier to transport but may have...
