

Taiwan Red Laser Diode

Overview

This report on Taiwan Red Diode Laser market is a comprehensive analysis of market shares, strategies, products, certifications, regulatory approvals, patent landscape, and manufacturing capabilities of the top players. And this market is projected to grow annually by 10.1% from. Arima Lasers 808nm/830nm 30W High power Laser Fiber Bundled Module wins the Outstanding Photonics Product Award of "2015 OPTO TAIWAN" Exhibition. Its integrated aspherical lens, laser diode, and APC (Auto-Power-Control) driver circuit delivers consistent, Class 3R, less than 2. As a major optoelectronics device supplier, we provide a total solution for optoelectronic devices by integrating ASICs, micro-optical, precise mechanical, and real-time information management. Red laser diodes are optimized for sensor applications such as barcode readers, ranging equipment, marking devices, and PM2. In addition to the 650-660nm band for DVDs, high visibility 635nm wavelength types are also available.
