

Tajikistan Steel Long-Span Bridge

Overview

The proposed Project will construct a 920-meter bridge and its approaches (the Long Bridge) on Obigarm–Nurobod section of M41 Highway to replace the existing segment that will be submerged by the Rogun dam reservoir. The alignment replacement will ensure continued connectivity along a vital. The Asian Infrastructure Investment Bank (AIIB) has approved a loan equivalent to US \$75. An agreement for the construction has been formalized between the Ministry of Transport of Tajikistan and the Chinese company Zhejiang Communications. DUSHANBE, Tajikistan, February 25. Perhaps above can also be done for repair works when asphalt shall be renewed. Troughs shall then be continuously without inside obstructions. The bridge carries the M41 international highway that links Afghanistan, Uzbekistan, Tajikistan and Kyrgyzstan. The particular section of the road.
