

Tajikistan Tuvalu Bridge

Overview

The bridge will be built as part of the Obigarm – Nurobod road construction project. It is planned to be 920 meters long (including the connecting roads, totaling 1,500 meters) and will be located in the Nurabad region, crossing the Surkhab river. Chinese workers have reportedly resumed construction on a critical highway along the Afghanistan-Tajikistan border where two such workers were killed in November 2025. The Ministry of Transport of Tajikistan and the Tajik branch of Zhejiang Communications Construction Group (ZCCC) Chinese company, have signed a cooperation agreement for the construction of the longest road bridge in Central Asia in the country, Trend reports. The Asian Infrastructure Investment Bank (AIIB) has approved a loan equivalent to USD75. 6M (ranked 91/197), compared with 9. Tajikistan's land area is 53,587 sq mi versus 11.
