

Technical Specifications for Complete Sets of Distribution Boxes

Article Overview

Complete distribution boxes are designed with robust enclosures, busbars, circuit protection devices, isolators, and optional smart monitoring features to safely distribute electrical power.

Components and Functionality

- **Circuit Breakers (MCBs):** Protect individual circuits from overloads and short circuits, automatically disconnecting power when faults occur .
- **Residual Current Circuit Breakers (RCCBs):** Detect imbalances between phase conductors to prevent electric shocks and enhance safety .
- **Isolators:** Manually operated switches that allow safe maintenance by isolating parts of the circuit .
- **Busbars:** Conductive metal strips (typically EC grade aluminum) that distribute power to multiple circuits; sizes vary with KVA ratings, e.g., 72×50×8 mm for 63/100 KVA and 120×50×15 mm for 160/315 KVA boxes .
- **Neutral and Grounding Links:** Provide return paths and safety grounding to prevent electrical hazards .
- **Surge Protective Devices:** Protect against voltage spikes from lightning or phase-to-phase faults .
- **Indication Lights:** Show mains power availability and operational status .
