

The fiber optic indicator light on the router is always on

Overview

This light indicates the connection between your ONT and your router or computer. Flashing Green/Blue: Data is being transmitted. LED Indicators on a Fiber Router: What Do They Mean?

Understanding LED Indicators on a Fiber Router Let's break down what the common LED lights on a fiber router mean and how they behave: 1. If OFF: The router is not powered — check the socket, adapter, or power. The Optical Network Terminal (ONT) is a crucial device in modern telecommunications, serving as the interface between your home network and the fiber-optic internet connection provided by your Internet Service Provider (ISP). One of the key aspects of the ONT is the array of lights on its front. What does that blinking light on your modem or router mean?

This guide covers every LED color and pattern across Xfinity, Spectrum, AT&T, and CenturyLink gateways, with step-by-step fixes for the most common issues. On most models — including the Langzhi L801, L880G, and L881G — you'll find the indicator lights on the front panel, usually with small icons or text labels underneath.
