

UK sells various optical cables

Article Overview

The UK offers a wide range of optical cables, including single-mode, multi-mode, pre-terminated, and high-speed fibre optic solutions for telecommunications, networking, and data applications.

Types of Optical Cables

- **Single-mode and Multi-mode Fibre:** Single-mode cables are ideal for long-distance communication, while multi-mode cables support high-bandwidth applications over shorter distances. Multi-mode options include MaxCap and WideCap fibres for 40 and 100 Gb/s applications, with low bending sensitivity for complex routing .
- **Pre-terminated and Structured Cabling:** Many suppliers provide ready-to-install cables with terminations, suitable for data centres, commercial buildings, and residential broadband installations .
- **FTTx Drop Cables and Loose Tube Cables:** These are used for fibre-to-the-home (FTTH) and other high-density deployments, offering flexibility and durability .
- **High-Speed HDMI Fibre Optic Cables:** For audiovisual applications, fibre optic HDMI cables allow longer transmission distances without signal degradation .

Key Suppliers in the UK

- **Prysmian:** Offers a full range of optical fibre and cable solutions, including bend-insensitive fibres, pre-terminated systems, and bespoke solutions for telecoms and data centres .
- **CMW Ltd:** Provides corrugated steel tape, FTTx drop cables, tight buffered cables, and pre-terminated solutions with next-day delivery options
