

Unit price for fiber optic junction box splicing

Article Overview

Fiber optic splicing typically costs \$50–\$150 per splice, while junction boxes range from \$20 to \$100 or more depending on type and capacity.

Splicing Costs

The cost of splicing fiber optic cables is usually calculated per splice point. For most commercial projects, fusion splicing ranges from \$50 to \$150 per splice, which includes labor and OTDR verification of each joint but generally excludes materials like closures or trays, mobilization, and project management . Factors affecting splicing cost include:

- Fiber count: Higher fiber counts reduce per-splice cost due to volume pricing. For example, a 12-fiber cable may cost \$100 per splice, while a 288-fiber project could drop to \$55 per splice .
- Site conditions: Aerial splicing in open areas is cheaper than underground vault work requiring traffic control or confined space entry .
- Fiber type: Standard single-mode fibers are straightforward, while ribbon fibers require specialized mass fusion splicers, which can increase costs .

Junction Box Costs

Fiber optic junction boxes (also called splice enclosures) vary in price depending on size, material, and features:...
