

Warranty warranty for PAM4 PoE switch

Article Overview

PAM4 PoE switches typically come with a standard hardware warranty of 1-3 years, with options for extended or annual warranty services depending on the manufacturer.

Standard Warranty

Most PAM4 PoE switches, such as those from HPE Aruba Networking, are covered under a manufacturer's standard warranty, which protects against defects in materials and workmanship for a defined period from the date of purchase. For HPE Aruba products, the standard warranty duration and terms are detailed in the Warranty End User License Agreement (EULA), and technical support is provided during local business hours for the warranty period . Cambium Networks, for example, provides a 1-year standard hardware warranty for most products, with some exceptions offering a limited lifetime warranty for specific product families .

Extended Warranty Options

Manufacturers often offer extended or annual warranty services for PAM4 devices. For instance, the HPE Smartoptics DCP-M40 ER/ER+/PAM4 can be covered under an Extended Annual Warranty Service, which prolongs coverage beyond the standard period and may include additional support or faster service response . These extended warranties are typically purchased separately and can provide peace of mind for critical network deployments.
