

What is FSR cable tray

Article Overview

An FSR cable tray is part of FSR Inc.'s cable management solutions designed to organize, protect, and route power, data, and AV cables efficiently in commercial and professional environments.

Overview

FSR cable trays are components of FSR's Smart-Way Raceway and other cable management systems, which provide structured pathways for electrical, data, and audiovisual cables across floors, walls, and ceilings . These trays are engineered to support multiple cables while maintaining a clean, organized, and safe installation, reducing clutter and improving accessibility for maintenance or future upgrades .

Key Features

- **Versatile Installation:** FSR cable trays can be installed in concrete or timber floors, mounted on walls, or integrated into ceilings, with options for flush, surface, or outdoor applications .
- **Load Capacity:** Many FSR trays and raceways are designed to support significant weight, with some models rated for up to 20,000 pounds, making them suitable for heavy AV and IT infrastructure .
- **Customizable Configurations:** FSR systems allow for flexible outlet placement and gang configurations, accommodating power, data, and AV connections in one organized pathway .
- **Aesthetic and Safety Benefits:** The trays help maintain a tidy appearance, prevent cable damage, and reduce trip hazards, while also supporting fire-rated and fan-forced options for enhanced safety .

Applications

FSR cable trays are widely used in:

- Commercial offices and conference rooms for structured power and data distribution.
- Educational and lecture environments to manage AV and IT infrastructure efficiently.
- Theaters, studios, and stages where multiple audiovisual cables need organized routing.
- Residential high-end installations for seamless integration of technology while mai...
