

What is gyta4a optical fiber cable

Overview

GYTA fiber optic cable is a stranded loose tube outdoor cable widely used for overhead, duct, and even direct burial applications. It combines strong mechanical performance with superior water resistance. In this article, we will discuss the characteristics of the GYTA optical cable. GY ——Communication room (field) outdoor optical cable T ——filled structure A ——Aluminum-polyethylene bonded sheath GYTA (metal strengthening member, loose tube stranded and filled, aluminum-polyethylene bonded sheathed outdoor optical fiber cable for communication) The structure of the optical. What is the GYTA fiber optic cable?

Author: James Xu Publish Time: 18-09-2018 Origin: <https://www.> With their sturdy construction and advanced features, GYTS/GYTA cables are the. These aluminum tape armored cables GYTA are suitable for installation for long haul communication and LANs, especially suitable for the situation of high requirements of moisture resistance.
