

What material is the optical fiber distribution box made of

Overview

Fiber Optic Distribution Box makes of stainless steel or cold-rolled steel with electrostatics plastic-spray surface: excellent waterproof and dustproof performance. Selecting the right material for your Fiber Distribution Box (FDB) is crucial for ensuring long-term reliability, environmental resistance, and cost-efficiency in your optical distribution network (ODN). In this guide, we'll dive into four of the most widely used FDB materials—SMC, ABS+PC, ABS, and. Fiber distribution box is made of high-strength engineering plastics, anti-UV, anti-aging ability. The fiber distribution box, a crucial component in optical fiber networks, serves a dual purpose of managing and protecting optical fibers while facilitating their efficient distribution.
