

What model is the xxr distribution box

Overview

The ACA-30-xxR Series with Passive Return Path are hybrid indoor broadband distribution amplifiers designed to be used in RF distribution systems such as those for apartment complexes, hospitals, schools, prisons, and hotels. Murrelektronik supplies a comprehensive range of distribution boxes: They create optimum installations for any application and are cost-effective, reliable. The distribution box (DB box) helps safely and efficiently distribute electrical power. Today, electrical systems are essential for homes and industries. SD 6/4 is an input signal box that distributes the signals from S-COM 19 connector or the six female XLR connectors on the front panel to ten male XLRs on the back panel. The four AES/EBU IN/OUT connectors are. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices.
