

Where in Turkmenistan is bridge construction still needed

Overview

The execution of a novel infrastructural project involving the erection of a bridge spanning the Garabogazgol Bay is currently in progress in Turkmenistan, Trend reports. A conclusion is made about the prospects for further work on the introduction of innovative technologies in relation to domestic bridge construction. Keywords: transport industry. Turkmenistan is realizing a number of important transport projects in the western part of the country, aimed at improving connectivity within the country, as well as on a regional scale and within the framework of overall connectivity in Eurasia along the North-South route directions. About two hundred bridges have been put into operation. The two-lane road is designed to accommodate vehicles with a carrying capacity of 40-50 tons. Chairman of the Halk Maslahaty of Turkmenistan, Gurbanguly Berdimuhamedov, during a working trip to the Balkan Region, visited.
