

# Where to leave the fiber optic cable reel

## Article Overview

Fiber optic cable reels should be stored upright on a flat, firm, and dry surface in a protected indoor or UV-proof environment, with end-caps in place and reels chocked to prevent rolling.

### Storage Location

Fiber optic cable reels should ideally be stored indoors or in a UV-protected container to prevent exposure to moisture, sunlight, and extreme temperatures, which can degrade the cable over time. Avoid placing reels outdoors in harsh environments, near chemical spills, open flames, or areas with excessive heat or humidity ( ).

### Orientation and Surface

- Place the reel upright on both flanges, never on its side or on a single flange, to prevent deformation or damage to the cable ( ).
- Ensure the surface is level, firm, and smooth to maintain uniform stress on the drum.
- Use chocks or stoppers to prevent the reel from rolling ( ).
- Maintain sufficient spacing between multiple reels to avoid contact between flanges and cable layers ( ).

### Protective Measures

- Keep protective end-caps on the cable to prevent contamination, moisture ingress, or mechanical damage ( )....
