

Wholesale of longitudinal displacement type optical attenuators

Article Overview

Longitudinal displacement optical attenuators are available wholesale with high precision, multiple interface options, and industrial-grade reliability for telecom, data center, and laboratory applications.

Overview

Longitudinal displacement type optical attenuators are variable optical attenuators (VOAs) that adjust optical signal power by changing the relative position of fiber cores along the optical axis. This method allows precise control of attenuation while maintaining signal integrity, making them ideal for WDM systems, receiver protection, and laboratory testing . They are widely used in telecom networks, 5G base stations, data centers, and high-power laser diagnostics .

Wholesale Suppliers and Platforms

- Global B2B Platforms Platforms like GLB Gate connect manufacturers and traders worldwide, offering fixed and variable optical attenuators, in-line attenuators, and custom ODM/OEM solutions. They support multilingual collaboration and bulk orders for telecom and lab applications .
- Alibaba and Industrial Marketplaces Alibaba provides a wide range of wholesale optical attenuators, including longitudinal displacement types, with specifications such as attenuation ranges from 0-60 dB, ± 0.1 -0.2 dB precision, and SC/LC/FC interfaces. Many suppliers offer bulk discounts, fast shipping, and industrial-grade certifications
